You have agreed to participate in one or more airbrush tanning sessions to achieve a sunless tan on your skin. For best results, please read and indicate that you understand and agree with the following information:

1. An airbrush tan, like any self-tanning product, will not protect your skin from burning in the natural sun or in a UV tanning bed. Please take the proper precautions when exposed to UV light.
2. For best results, we recommend 2 sessions within 7 days to develop your desired color. Maintaining your color is possible with subsequent visits every 5-10 days. Healthy, hydrated skin will hold results longer and achieve color faster. Ask a tanning consultant for a recommendation of the best regimen for your skin type.
3. For best results, wait 6-8 hours after being airbrushed before showering. This will allow your airbrush tan to fully develop and will ensure the optimal results.
4. The initial bronzers in the airbrush tanning solution may transfer to clothing or fabrics. The bronzers are water soluble; they will wash out of most fabrics. Silk, lycra, spandex, nylon, wool or leather can stain.
5. The airbrush technician is trained to provide a smooth even tan. However, due to normal skin variations, and session variables, it is possible you may occasionally find some areas of your tan slightly lighter than others. In most cases, these differences are minor and disappear after a few sessions.
6. Because of the moisturizing agents in the mist, your eyes may feel itchy or scratchy. The ingredients in the solution are harmless, and will not damage your eyes.
7. All the components of the airbrush tanning solution have been safely used in cosmetics and nutritional products for decades and have been proven to be safe for the skin. If you have had adverse effects utilizing self-tanning products or moisturizers in the past, you may experience similar effects with the airbrush system. Please discuss this with your technician before proceeding.
8. We recommend that you hold your breath, during facial spraying. We make this recommendation, because most individuals would prefer not to breathe the mist. The solution is not considered harmful, in the minimal amounts that may be inhaled in a normal spray tanning session.
9. Many customers wear disposable shower caps to prevent the solution from settling into hair. Others tan without covering their hair. The solution normally won't penetrate the hair shaft and hair is generally unaffected. Though rare, some porous, coarse, or processed hair types, if uncovered, can be affected.
10. If you have any history of asthma or other respiratory or medical conditions that could be aggravated by the use of the Airbrush system or solution, please consult a physician before proceeding. Please apprise your tanning technician of any past allergic reactions to DHA products, latex, or other medical concerns. Mobile salon is not responsible for allergic reactions to the solution.
11. I have read the Pre/Post Tan Care information on the website.
12. Airbrush technician or mobile salon has the right to refuse service to anyone at anytime without reason. There are no refunds after services have been provided. This agreement is in affect for all future services.

I, the undersigned, understand and agree to comply with all instructions. I have been properly instructed prior to my Airbrush Session. I am using these services at my own risk. I hereby authorize and direct employees or agents of the mobile salon to perform such tanning procedures as may be deemed necessary or advisable, and have provided them with the above information required. I acknowledge that the results of airbrush tanning do vary, and that no guarantees of specific results are offered or implied. I hereby relieve this establishment, as well as the airbrush technician, and hold them harmless, from any liability involved in the use of the tanning process. The salons and their agents or employees are not liable for any injury to person or property or the loss or theft of any personal property.
